Questions. Please Explain

Classroom or professional experience in Software Development utilizing C/C++ or similar programming tools?

Yes, I have experience using object-oriented languages such as C++ during my studies at school. Additionally, I have utilized similar languages like Java during my internships and personal projects. This experience has allowed me to gain proficiency in software development and object-oriented programming, making me well-equipped to handle projects involving C/C++ or similar programming tools in both classroom and professional settings.

Degree in computer sciences or related field?

Yes, Bachelors in Computer Science
